FRAMEWORK AND EQUIPMENT
MADE OF CARDBOARD ANGLES

Packaging and MOQ

We ensure the aesthetics of deliveries, even from a 30pcs order.

Corebox is always packed as an easy-for-installation set. Most often 4 sets packed on one pallet, 8 sets in the transport post.

At the customer's request, we label each piece individually with an internal number or code.

SOLUTION FOR BUSINESS

MORE EFFICIENT WORKERS

Low self-weight, installation without tooling, simple and durable design are just some of the advantages, that your employees will appreciate as much as and your entire supply chain.

ECOLOGY

Be Eco Without sacrifices! Lighter loads can significantly reduce the carbon footprint in transport. Using Corebox containers, you contribute directly to improving the air quality. Our packaging can be 100% recyclable.

PATENT PENDING

Possible weight reduction up to 80% compared to traditional containers shipping and matching packaging for the product is cheaper transport and more profitability of production.

CHEAPER TRANSPORT

Proven by research at the Warsaw Institute COBRO static strength for column compression, up to 10.2 tons!

STRENGTH

SUSTAINABLE BUSINESS

Each of our selections affects the environment. Run your company in accordance with CSR, choose Corebox and reduce carbon footprint in your supply chain.

PRINT

Increase your brand recognition with an extraordinary print. Let your imagination go and let yourself be noticed.

Air cargo

1

Every gram is precious as gold. Sending your products by air you do not want to overpay for additional packaging weight. Our experience shows that you can save up to 80% on the transport of packaging by choosing cardboard Corebox container.

02

Furniture industry

2

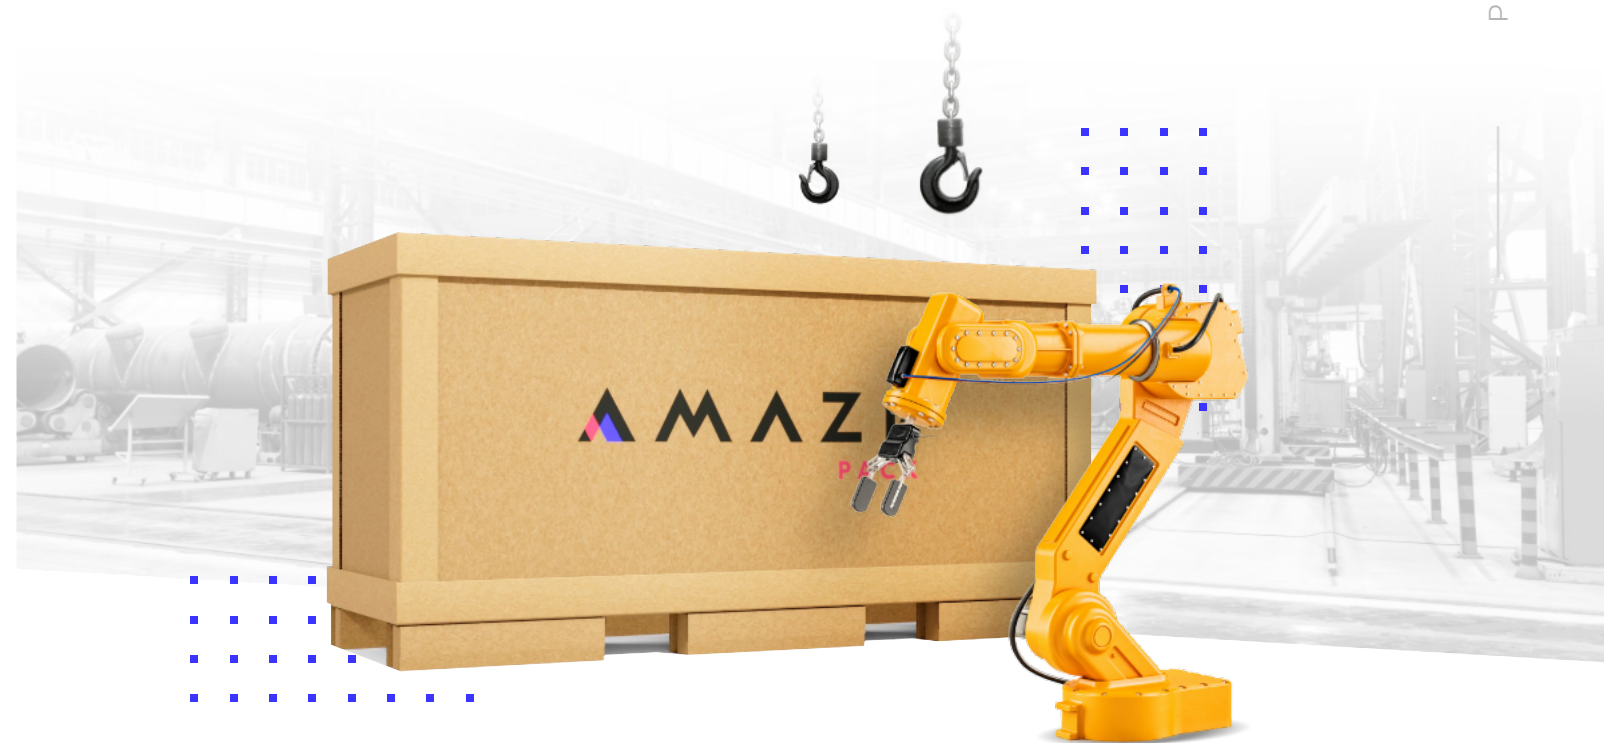

Office, consumer furniture or acoustic cabins. We have ready-to-deploy solutions for furniture companies. It is our experience in the industry that guarantees success and ensures that the goods reach the customer without scratches or mechanical damage.

Automotive

3

We understand the dynamics of the automotive industry perfectly. We offer flexible deliveries in just-in-time system, even in small volume to ensure uninterrupted and smooth productions to our partners. Intuitive Corebox container sets will allow you to speed up packaging processes, becoming another element in the process of continuous improvement.

Heavy industry

4

The container for special tasks will work in the most demanding conditions. 10.2 tonnes of static payload as well as moisture resistance will secure your supply chain. We will adapt the Corebox for the transport of robots, castings or materials after CNC treatment.
